

## OUR NEW WINERY FOR HARVEST 2016 & BEYOND!

- 14,000 square feet
- The first winery-installed solar array in the Rogue Valley
- Dedicated specialized processing lines for luxury-quality white and red wines featuring the most innovative destemming technology available
- State-of-the-art processing and lab equipment
- Heavy emphasis on sustainable, low-impact methods for energy conservation, including using gravity to move fruit and wine, passive ventilation for building cooling, and an on-demand tankless water heater
- High-pressure, low-flow barrel and tank-cleaning technology to minimize water use
- Small batch fermentations to minimize temperature control needs
- Energy-saving LED interior and exterior lighting
- Anti-microbial epoxy coating to finish the concrete floors
